ABL TASKS

Activity-Based Learning — Web Development Tasks

TASK 1: PERSONAL PORTFOLIO WEBSITE

1. AIM

To design and develop a responsive personal portfolio website using semantic HTML5 tags and styled with external CSS3 to display personal details, education, technical skills, projects, achievements, and contact information effectively.

2. CODE EXPLANATION

HTML Structure (.html)

- **Header & Navigation (<header>, <nav>):** Displays website title and top navigation links for internal section scrolling.
- **Home & Education Sections:** Features welcoming text and styled cards for B.Tech and Intermediate qualifications.
- **Skills & Hobbies Sections:** Lists technical skills (HTML, CSS, Python, C) and recreational hobbies.
- **Projects & Achievements Sections:** Details completed projects and academic accomplishments.
- **Resume & Contact Footer:** Features a download resume action button and personal contact details.

CSS Styling (style.css)

- **Flexbox Navigation & Card Layouts:** Configures dark blue navigation header, centered cards (`.card`) with shadow effects and hover translations.
- **Media Queries (@media):** Ensures vertical navigation stacking on mobile viewports.

3. PROCEDURE

1. Create project directory containing index HTML, external stylesheet CSS, and assets.
2. Structure semantic HTML sections including headers, list containers, and action links.
3. Apply CSS styling rules for background colors, font formatting, shadow effects, and flex layout.
4. Link stylesheet to the HTML header and open in browser to inspect interactive elements.
5. Capture output screenshots across all rendered sections.

4. OUTPUT (SCREENSHOTS)

TASK 2: COLLEGE INFORMATION WEBPAGE

1. AIM

To construct a College Information web page utilizing basic HTML layout tags (headings, paragraphs, ordered/unordered lists, campus image, and footer) styled with external CSS to clearly communicate institutional details.

2. CODE EXPLANATION

HTML Structure (2.html)

- **Header (<header>):** Displays main college title (<h1>) and welcome text.
- **About & Department Lists (<ul>):** Unordered list displaying engineering disciplines (CSE, IT, ECE, Mechanical).
- **Facilities List (<ol>):** Ordered list displaying campus infrastructure (Library, Labs, Sports Ground, Hostel).
- **Image & Contact Footer:** Displays campus building image (`nri.jpg`) and institutional contact info.

CSS Styling (style2.css)

- **Banner Styling:** Styles top header and footer with blue background (`background-color: blue`) and centered white text.
- **Typography:** Applies global Arial font and styles section titles with dark blue color scheme.

3. PROCEDURE

1. Create workspace with HTML file (`2.html`), CSS stylesheet (`style2.css`), and photo asset (`nri.jpg`).
2. Write markup containing header, paragraph info, course lists, facility items, and contact details.
3. Apply CSS rules to set background colors, font family, padding, and centered text alignments.
4. Link stylesheet inside HTML head tag and launch in browser to verify layout.
5. Take full page screenshots of the output.

4. OUTPUT (SCREENSHOTS)

TASK 3: MY RESTAURANT WEBSITE

1. AIM

To design an interactive restaurant website displaying food menus, dish images, pricing, table booking input fields, and opening timings using HTML5 forms and external CSS3 styling.

2. CODE EXPLANATION

HTML Structure (3.html)

- **Header & Navigation (<nav>):** Main restaurant title header and black navigation bar linking to internal sections.
- **Menu Section (#menu):** Embeds images for Pizza, Burger, and Ramen alongside their price labels.
- **Booking Form (#contact):** Form fields for text input (Name), date picker, and booking submission button.
- **Footer (<footer>):** Displays closing thank-you message.

CSS Styling (style3.css)

- **Theme & Colors:** Styles light yellow background, brown header banner, orange home container, and pink menu section.
- **Form & Button Styles:** Formats input boxes and green table reservation button with contrasting white text.

3. PROCEDURE

1. Organize workspace containing `3.html`, `style3.css`, and dish images.
2. Draft HTML markup specifying title, menu images, pricing headings, and table booking form controls.
3. Apply CSS rules for centered text alignment, section colors, input field sizing, and button styling.
4. Link CSS file to HTML head section and launch in web browser to test.
5. Capture complete output screenshots documenting rendered browser pages.

4. OUTPUT (SCREENSHOTS)
